

# Clinical Ethics: Organ Transplantation

Tuesday 28<sup>th</sup> April 2026  
8.30am – 5.00pm  
Deakin Downtown, Melbourne

Deakin University's School of Medicine is offering a one day training course focusing on Clinical Ethics in Organ Transplantation.

The course has been designed by Deakin Bioethics in collaboration with clinicians involved in organ transplantation. Participants will explore the fundamental principles guiding organ donation and transplantation as well as recent developments and debates in transplant ethics. The focus will be on ethical issues relating to decision-making about living donation and transplantation of organs from living and deceased donors.

Providing a practical introduction to ethical decision-making, the course will facilitate learning using interactive multidisciplinary case-based discussion.

**Tuesday 28<sup>th</sup> April 2026, 8.30am – 5.00pm**

Deakin Downtown, 727 Collins Street, Melbourne VIC 3000

**Cost:** \$660, medical practitioner (qualified specialist)  
\$550, medical practitioner (residents, registrars and fellows)  
\$330, nurse, non-medical donation/transplant coordinator, allied health

Tickets are inclusive of course materials and refreshments (coffee, morning & afternoon tea, lunch). Group discounts may be available upon request.

All attendees will receive a certificate of completion, identifying the number of CPD hours for the course.
